PROFESSIONAL EXPERIENCE

SCRUM MASTER | **Bank of America** | Charlotte, NC

January 2026 – July 2026

- Lead all meetings and Agile ceremonies for a high performance and defect prone application team with an extensive total number of end users, while generating ideas for various process and workflow improvements during 6+ deployments
- Facilitated the deployment of new user Interface and Technical Debt features on the production lane by being involved throughout the entire Application Development Roadmap and assisting team members with backlog prioritization
- Initiated roadmaps for implementing team retrospective action items and implemented LLM (Large Language Model) Artificial Intelligence in various documentation workflows to improve efficiency, accuracy, and data transparency

BUSINESS ANALYST | **Bank of America** | Charlotte, NC

August 2023 – January 2026

- Completed team documentation related to various business activities (Deployments, Quarter Planning, and Defect Remediation) to maintain company compliance guidelines while upholding data, documentation, and structural integrity
- Prioritized team backlog for future deployments by understanding committed enhancement and technical deliverables and maintaining cross-team communication between the development and business teams for over 30+ production deployments
- Assisted with coverage for various team members within the development and business teams, while escalating any future risks for various application teams performing under both Agile and Waterfall (Business-as-Usual) methodologies

GLOBAL ADMINISTRATION INTERN | **Universal Music Publishing Group** | Santa Monica, CA

June 2022 – August 2022

- Audited company Data Transparency by generating reports, running queries, and manually identifying missing/incorrect entries
- Operated centralized Database to organize Financial Statements for clients, update and monitor Royalty and Copyright data
- Attended training and work sessions with music industry professionals within Publishing, Recording, and various labels

INFORMATION AND DIGITAL SOLUTIONS INTERN | **Eli Lilly** | Virtual

May 2021 – August 2021

- Managed the end-to-end development lifecycle for a cross-functional team, deploying 3 new features to the production environment of an enterprise-level employee UI application used by Eli Lilly's global workforce
- Acted as a Technical Scrum Master, facilitating daily stand-ups and leveraging JIRA data analytics to monitor team velocity, manage the product backlog, and identify process bottlenecks
- Assisted with Quality Assurance Testing of new enhancements on lower lane environments before deployment in production
